# Pardus Package Manager

The Package Manager is the graphical interface to PiSi. This is the user-friendly interface to add, remove and update packages. It also features the auto-update feature to monitor security updates.

You can reach it from many ways in Pardus:

- From system tray if you selected that in Kaptan Desktop or activated from Package Manager settings.
- System tab in Tasma
- If your Pardus version is greater than or equal to 2007.2 Pardus Menu-->Package manager

# Repositories

Repository (Pardus-2009.2) - http://packages.pardus.org.tr/pardus-2009.2/pisi-index.xml.bz2 (recommended)

Repository (Contrib-2009) - http://packages.pardus.org.tr/contrib-2009/pisi-index.xml.bz2 (recommended)

Repository (Pardus-2008.1) - http://packages.pardus.org.tr/pardus-2008.1/pisi-index.xml.bz2 (may not work)

Repository (Contrib-2008) - http://packages.pardus.org.tr/contrib-2008/pisi-index.xml.bz2 (may not work)

Repository (Pardus-2008.1) - http://paketler.pardus.org.tr/pardus-2008.1/pisi-index.xml.bz2 (may not work)

Repository (Contrib-2008) - http://paketler.pardus.org.tr/contrib-2008/pisi-index.xml.bz2 (may not work)

Repository (Pardus Gnome) - http://pardus-gnome.prj.be/pisi-index.xml.bz2
